

Allianz Sweeper Company

Street Sweeper Product Line

Keeping Your City Clean...

3000/MX Mechanical Sweeper

The Allianz 3000/MX three-wheel sweeper sets the standard for street sweeper equipment.

Purpose built designed with reliability, safety and ease of use as the fundamental attributes.

12.5' turning radius offers excellent maneuverability.

Low center of gravity eliminates chance of a rollover as with competitive three wheel sweepers.

Features an overthrow system which helps collect more debris than the competition.

Integrated systems locker provides easy access to key systems components.

Single engine design, with speeds up to 25 MPH

PM-10 water system improves air quality

Safe design with high visibility and fingertip controls.

High-dump 5.6 cu yd. hopper

4000 Mechanical Sweeper

The Allianz 4000 is a high performance sweeper that offers unmatched reliability, safety and ease of use.

Toughest and most rugged purpose built mechanical sweeping system ever constructed.

Capable of removing large amounts of debris with specially designed equal-width pick-up broom and elevator system.

Optional leafgate system hydraulically opened from inside the cab for bulky debris (branches, leaves, etc).

Single engine design, with speeds up to 65 MPH

PM-10 water system improves air quality

Safe design with high visibility and fingertip controls.

Exceptional maneuverability.

High-dump 5.6 cu yd. hopper.

CNG Alternative fuel option for reduced emissions.

MS/MT350 Mechanical Sweeper

The Allianz MS/MT350 is a high performance rugged sweeper offering total dependability and sets the global benchmark for truck-mounted sweeper quality..

Exceptional performance with single or twin engine.

Variable height debris dumping system.

Large debris hopper and water tank capacity increases productivity.

Hydraulically operated discharge door automatically opens when container is tilted.

Complete OEM dual power steering system with identical gauges at each operator's position permits operation from either side of cab.

CNG Alternative fuel option for reduced emissions.

▼ Vacuum & Regenerative Sweepers / Litter Collection System

The Allianz Johnston VT650/800 are designed to meet the requirements of the most demanding municipal and contractor applications.

Straight through suction system works well in heavy duty work sites.

Huge 190 sq inch vacuum nozzle for heavy leaf pickup.

Patented gearbox driven fan eliminates belts and other high wear components.

Stainless steel 8.5 cu. yd. hopper & 343 gal. water tanks.

Can be mounted onto an assortment of chassis.

Great for applications such as road resurfacing and pickup at construction sites and access roads.

Sealed engine compartment for low sound levels.

Lower cost of operation compared to other sweepers.

In-cab control panel features small easy to use controls.

VT 650/800 Vacuum Sweeper

The Allianz Johnston RT655 offers features that are unmatched in the industry.

Patented gearbox driven fan eliminates high-wear components.

Gearbox drive system reduces fuel consumption and improves performance.

Can be mounted on an assortment of conventional and cab over chassis, for fleet standardization.

Optional 8 cu. yd. stainless steel hopper

Compact design permits mounting onto a short wheelbase resulting in unrivaled maneuverability.

The hood features an in-cab control feature for collection of bulky litter and trash.

Allows for sweeping in reverse without worrying about damaging the sweep gear.

RT655 Regenerative Sweeper

The Allianz LT500 is the most reliable method for quick and efficient trash collection.

Straight through suction with no restrictions increases pick-up of trash and reduces the time it takes to remove litter on even the most difficult to clean surfaces.

Optional water recirculation system filters water from the debris hopper, resulting in less water usage, greater productivity, and cleaner air to help protect the environment.

Optional wanderhose for difficult to reach areas, such as tree wells, litter receptacles, in between cars, and bus shelters.

Large debris hopper increases productivity

In-cab controlled robotic vacuum arm with 12" hose.

LT500 Litter Collection System

ISO 9001:2000
